

eHID

Less energy. Enhanced performance.

Now available from Universal - the Vossloh-Schwabe Electronic HID

Universal Lighting Technologies, Inc. is pleased to announce the new product offering of Vossloh-Schwabe electronic HID ballasts. Vossloh-Schwabe of North America, which is the nation's #1 manufacturer of electronic HID ballasts, recently merged with Universal. Both companies are members of the Panasonic family. This merger has brought together two industry leaders in technological innovation and customer satisfaction. The new Electronic HID will replace the e-Tensity HID ballast family.

Electronic HID can be used in a broad range of applications from lighting a warehouse, big-box retail store, factory or manufacturing facility to schools and parking lots. Electronic HID ballasts bring improvement in cost, efficiency and wattage savings over conventional magnetic ballasts. eHID units provide 7% - 17% wattage savings for 39W – 150W.

For more information on the new eHID product offering, please visit our website at www.unvlt.com or call 1-800-BALLAST.
